Professional Summary

Detail-oriented **Full Stack Web Developer** specializing in HTML5, CSS3, JavaScript, and Python. Experienced in building responsive user interfaces, integrating APIs, and optimizing web application performance. Passionate about AI integration and eager to contribute to scalable tech solutions in a fast-paced environment.

Technical Profile

Frontend: React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Backend: Python, Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, DSA Fundamentals

Experience

Independent Dev Work

Meerut, India

Hackathon (Live Project Environment)

2025 - Present

- Developing responsive web applications using the MERN stack with a focus on UI/UX.
- Collaborating with teams to gather requirements and deliver code via **Git version control**.
- Optimizing website performance resulting in faster load times and improved SEO rankings.
- Conducting peer code reviews to maintain high standards of code quality and maintainability.

Key Projects

Missing People Finder (v1.0) | React, Python, MongoDB

Feb 2026

- Engineered a secure portal for public safety to track missing individuals in real-time.
- Integrated a **robust authentication system** to protect sensitive data and user privacy.
- Streamlined frontend usability to ensure high performance in critical, high-stress scenarios.

CivicSense - Smart Civic Reporting & Awareness Platform | React.js, Supabase, Node.js

June 2025

- Built a citizen-centric platform for reporting and tracking civic issues through geotagged reports, media uploads, and interactive maps.
- Designed features for community participation, issue resolution tracking, and civic awareness incentives to improve public engagement.

InstaFlow - Instagram Workflow Automation Platform | React.js, Supabase, Nodejs, Playwright

Nov 2025

- Engineered an automation system that automatically browses content, selects reels, and distributes them to target groups on scheduled intervals.
- Built a dashboard for automation control, activity logging, authentication, and performance monitoring.

Education

Sir Chhotu Ram Institute of Eng. & Tech. (SRIET)

Meerut, India

Bachelor of Science: Computer Science (Honors)

Expected July 2027

- **Highlights:** Specialized in Data Structures (DSA), AI, and Web Architecture.
- **Achievements:** Active participant in university tech fests and coding hackathons.
- **Key Coursework:** Data Structures and Algorithms (DSA), Artificial Intelligence, Database Management Systems (DBMS), Web Application Architecture, Operating Systems.
