PROFESSIONAL SUMMARY

Full Stack and Web Developer with hands-on experience architecting responsive, scalable web applications using the MERN stack (React.js, Node.js, Express.js, MongoDB) and Python. Skilled in building performant, accessible user interfaces, designing and integrating RESTful APIs, and optimizing application performance for speed and SEO. Proven track record delivering production-grade projects spanning real-time platforms, automation systems, and civic-tech tools. Strong foundation in Data Structures & Algorithms, database design, and AI integration, with a track record of collaborating cross-functionally in agile, fast-paced environments.

TECHNICAL SKILLS

Web Development (Frontend)	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive & Accessible UI Design
Backend Development	Python, Node.js, Express.js, RESTful API Design, Authentication & Authorization
Databases	MongoDB, MySQL, Data Modeling
Tools & DevOps	Git, GitHub, VS Code, Postman, Figma, CI/CD Fundamentals, Vercel Deployment
Core Concepts	Data Structures & Algorithms (DSA), Web Application Architecture, Performance Optimization

EXPERIENCE

Full Stack Web Developer Intern	April 2025 - Present
Hackathon (Live Project Environment)	Meerut, India
- Architected and developed responsive, cross-browser web applications using the MERN stack, improving UI consistency and usability across devices. - Collaborated with cross-functional teams to gather requirements and ship features iteratively, managing version control workflows for a multi-contributor codebase via Git. - Optimized front-end performance by reducing page load times and improving Core Web Vitals, resulting in stronger SEO rankings and user retention. - Conducted peer code reviews and enforced coding standards, improving code maintainability and reducing post-release defects.	

Web Development Intern	Jul 2026 (3 weeks)
InAmigos Foundation	Remote
- Independently designed and developed a responsive, AI-powered personal portfolio website using React.js and Node.js, implementing animated UI components and mobile-first layouts. - Conducted a full usability and UI/UX audit of the foundation's website, identifying navigation, accessibility, and design gaps, and delivered a redesign proposal with prioritized recommendations. - Designed high-fidelity UI screens in Figma for core NGO features — including donation management, volunteer registration, campaign pages, and an impact statistics dashboard — to improve user engagement. - Researched competitor NGO platforms and industry best practices, compiling a feature comparison report and requirement documentation to guide future website enhancements. - Authored professional project documentation and stakeholder presentations to communicate audit findings, UI designs, and an implementation roadmap.	

KEY PROJECTS

Missing People Finder (v1.0) — React, Python, MongoDB	Feb 2026
- Engineered a secure, real-time web portal enabling public safety agencies to track and locate missing individuals efficiently. - Implemented robust authentication and access controls, safeguarding sensitive user data and ensuring privacy compliance. - Streamlined frontend usability and response times to maintain reliable performance in critical, high-stress scenarios.	
CivicSense - Smart Civic Reporting & Awareness Platform — React.js, Supabase, Node.js	June 2025
- Built a citizen-centric web platform enabling geotagged issue reporting, media uploads, and interactive map-based tracking of civic issues. - Designed community engagement features, including resolution tracking and awareness incentives, to increase public participation by making civic reporting more transparent and accessible.	
InstaFlow - Instagram Workflow Automation Platform — React.js, Supabase, Node.js, Playwright	Nov 2025
- Engineered an end-to-end automation system to browse, select, and distribute content across target groups on scheduled intervals, reducing manual content operations. - Built an administrative dashboard for automation control, activity logging, authentication, and performance monitoring, improving operational visibility.	

EDUCATION

Sir Chhotu Ram Institute of Engineering & Technology (SRIET)	Meerut, India
Bachelor of Science: Computer Science (Honors)	Expected July 2027
- Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Database Management Systems (DBMS), Web Application Architecture, Operating Systems, Machine Learning Foundations. - Active participant in university tech fests and competitive coding hackathons.
